Sue Scheff - People who are Obsessed

Authorities are now calling it "Internet Terrorism" - A new growing concern in Cyberspace

Tuesday, August 14, 2007

Sue Scheff - "What will they do next?"

I have read claims, Blogs, and horrific postings about my [organization](#) and myself being served a lawsuit - this is **not** true. Neither myself nor the other defendants listed on what they are posting have received any such lawsuit. If there is a lawsuit, we certainly don't know about it and you would think the defendants should have it?

This is a further campaign to discredit me which has recently escalated since I will be on [20/20 i-Caught](#) this evening and the Judge in my case upheld the \$11.3M Judgment after the defendant, [Carey Bock](#), attempted to have it set aside.

Freedom of Speech is still in place, but it doesn't condone defamation.

This type of malicious conduct on the Internet proves why [Reputation Defender](#) is a priceless service.

Sue Scheff

People have strange obsessions...But I will always defend myself and my family.

It is a large sea of turtles...

slowly - but faithfully, watching me. I pray someday they get a life for themselves.
